Mother's Notes

On April 2nd following the birth of baby, Mr. Lembrock, Ray and I went to Fargo for a checkup of baby. He (Joseph) was doing fine & that night Ray & I came home to home to start keeping house again. The next day, ~~Thursday~~ ^{Wednesday} I didn't feel very well, but did my own work. Baby was very fussy & we had to get up quite a few times during the night. The next morning I felt worse. Ray took my temperature & it was 101° - so we called my folks. They came up & mother stayed with us. I had infection in my breasts. They were terribly sore, but I tried to keep nursing baby. Sunday morning we called Dr. Ellingson. My temperature was 103.4° . By afternoon it was 104.8° & I had to go to the hospital in Detroit Lakes. I was there a week. Mother kept the baby. Then I stayed another week with the folks after I got back from the hospital. Then I stayed three days with Lembrocks. Then came back home to the bank again. We had Mrs. Leigert to ^{for} three days & one day later ^{to help wash}. I had to wean baby. First fed him cow's milk & ^{a few weeks} later condensed milk with ^{distilled maltose} - then change again to Fars syrup.
